Subject: Opportunity for CA Professionals

We are one of the leading automobile manufacturers in India with a strong financial and operational framework. We have immediate vacancies for industrial Trainees in the Finance Function.

Position: Data Analytics Specialist – Internal Audit
Department: Audit-Plant
Location: Factory, Chennai
Experience Required: 2~4 years
Employment Type: Full-time

About the Role
Digitalisation & Data driven thinking is an integral part of Internal Audit to enhance audit analysis and gather insights through advanced analytics and visualization tools.
We are seeking a motivated professional with strong foundation in Data analytics and expertise in **Python, Streamlit, SQL, HTML and BI Tools (Qlik Sense, Power Bi)** to develop continuous control risk/governance monitoring and automate audit analytics.

Required Skills & Experience
- **Minimum 2 years of industry experience** in data analytics or internal audit analytics role
- Strong proficiency in:
- **Python** (data processing, pandas, numpy, etc.)
- **Streamlit** (developing interactive web applications)
- **SQL** (data extraction, transformation, and validation)
- **Qlik Sense** (dashboarding and visualization)
- Experience in handling large datasets and performing statistical/data analysis.
- Good understanding of **internal audit processes, risk management, or compliance**(preferred).
- Strong problem-solving, analytical thinking, and communication skills.
- Ability to work independently and in collaboration with cross-functional teams.

Key Responsibilities

- Design, develop and maintain **Data analytics solutions** to support internal audit activities.
    - Build and deploy **interactive applications** using Python and Streamlit, SQL or HTML applications to automate and streamline audit processes.
    - Develop and manage **Qlik Sense dashboards** to deliver actionable insights on audit findings, risk indicators, and business trends.
    - Create and optimize **SQL queries** to extract, transform, and validate data from multiple enterprise systems.
- Collaborate with internal stakeholders to identify opportunities for **digitalisation and automation** within audit workflows.
    - Create a **Continuous Control Monitoring (CCM)** mechanism to generate Red flags with alert mechanism
- Support the Internal Audit team in performing **data-driven risk assessments, compliance checks and fraud detection analysis**.
- Ensure compliance with data security, confidentiality and corporate governance standards.
- Provide technical guidance and contribute to the continuous improvement of audit analytics capabilities.

Interested candidates can share their profiles to nancy@hmil.net on or before 10th Sept 2025.

Unfeigned Regards
HR Team, Hyundai
